

3.3.1

Encouraging innovation and knowledge transfer, the organization has built an ecosystem around research, entrepreneurship, community orientation, incubation, and other specialized centers. It is encouraged for Andhra Loyola College staff members and students to propose unique and imaginative ideas and solutions. Wikipedia offered the chance to publish research articles and many contribute e-content on a regular basis, allowing staff and students to explore their creative ideas. Over three hundred women received training in the cultivation of mushrooms, with each unit earning approximately 25,000 rupees per month. The management works hard to preserve the environment and promote greenery with the motto "Save Nature, Save Life."

Research: (DST – FIST)

Staff members and researchers at college are often actively engaged in research in various fields. In addition to encouraging graduate and undergraduate students to work on research projects, they carry out experiments, write publications, and add to the corpus of knowledge in their fields.

Entrepreneurship:

The study of mushrooms offers special opportunity to those who are interested in sustainable agriculture and food production. Because of their nutritional value, culinary applications, and possible medical benefits, mushrooms have become more and more popular in recent years.

Community orientation:

Engaging in a community service project during the college years is a great way to give back to the community, develop important life skills, and enhance your resume. Create a detailed project plan that outlines the timeline, tasks, and resources needed.
