4.3.1 - The Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

Andhra Loyola College replenishes its IT infrastructure frequently to keep up with changing demands from academia, research, and efficient administration. A committed group of people maintains all the amenities, and creates financial plans for upcoming purchases, aggregates them, and makes recommendations for the best hardware and software to buy. Academic requirements encompassing teaching-learning, evaluation, testing, and other requirements are provided by the internal ERP solution of ALC, with the help of a committed staff.

Recent enhancements to the college's IT ecosystem include the establishment of 10 state-of-the-art computer labs, each equipped with both Linux and Windows environments to cater to diverse user preferences and academic requirements. This expansion underscores the college's commitment to fostering digital literacy and providing students with access to cutting-edge technology. Furthermore, the campus boasts a robust 200MBPS leased line interconnection, facilitating high-speed internet access across all areas. This infrastructure upgrade, implemented as of December 1, 2020, not only supports ICT facilities but also enables seamless online learning, research, and collaboration among students, faculty, and staff.
